

T40F-SMART collection

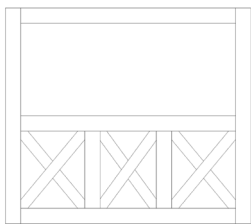

At a glance:

- Built on a metal door with artificial wood trim for durability
- Vinyl-back insulation is included
- Available in your choice of design (see below)

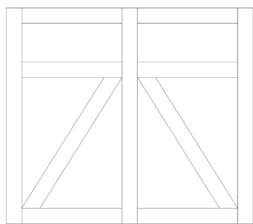

Durable, beautiful, and smart

An affordable yet high-quality option, our T40F-Smart collection of Garage Doors provide years of low-maintenance operation, especially compared with a wood overlay or similar door. Using LP siding as an overlay on a flush panel, Clopay-

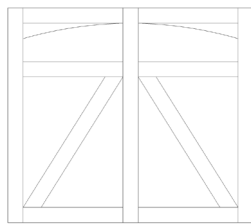

brand, 2" thick, 24-gauge steel garage door, our in-house craftsmen create a 3-dimensional effect that is more striking and upscale than a typical carriage-house style garage door. See the drawings below for the standard designs that we offer!
